Preview 2Q24F: Profit to recover QoQ

Despite lower profit contribution from the P&R* segment and a hit from the single gas pool price of >Bt8bn, by our estimates, 2Q24F net profit (release Aug 9) will grow 62% YoY and 13% QoQ to Bt32.6bn. Behind this is much lower FX losses than in 2Q23 and 1Q24 and more extra gain from oil hedging by associates. We expect operating profit to weaken QoQ on lower profit from gas P&R, and oil businesses; the E&P business is still the key earnings support. Earnings will improve QoQ in 3Q24F on recovering profit in the P&R segment, in line with refining margin, but with a partial offset by lower profit from E&P and gas businesses due to maintenance shutdowns. Current share price is undemanding at 0.8x PBV (2024F) and 8.4x P/E vs. 10-average of 1.3x and 14.6x. It still deserves an Outperform rating with sum-of-the-parts TP of Bt45. Dividend yield of 6.3% is also compelling.

Lower profit from gas business expected. Gas sales volume is expected to improve 7.6% QoQ to 4,837mmcf on higher gas consumption by the power sector (+9.9% QoQ) upon the startup of a new power plant in March (Gulf PD Block 3). On a YoY basis, gas sales volume declined as hydropower plants supplied a greater proportion. Despite a full-quarter operation of Block G1/61 (Erawan) at 800mmcf as specified in the PSC, gas sales volume to gas separation plants (GSP) is expected to remain flat QoQ due to planned maintenance shutdowns in 2Q24. We expect EBITDA contribution from gas to weaken QoQ on the hit from a retroactive adjustment of gas price to align with the single gas pool price: this been in effect since January, but the official document was not available until May. This will cost the gas business as much as Bt1.3-1.4bn/month, implying a Bt7.8-8.4bn burden in 2Q24. This will be offset somewhat by gain from divesting 50% interest in LNG terminal 2 to EGAT (~Bt4-5bn).

Profit of P&R and oil businesses to weaken QoQ on narrower margin. We expect the 53% QoQ plunge in market GRM to slice contribution from P&R associates to PTT's operating profit by 53% QoQ, though with some offset by inventory and oil price hedging gains. Petrochemical operating profit is expected to inch up QoQ on slightly higher product spread, but profit contribution will be miniscule. Sales volume for the oil marketing business via OR is expected to fall 7.6% YoY and 1.5% QoQ in 2Q24 on lower seasonal demand for travel in Thailand and lower diesel consumption in the power sector as natural gas price is normalizing. We expect inventory loss and higher competition to pull gross margin/liter down 4% YoY and 18% QoQ to Bt0.92/liter.

3Q24F operating profit to soften QoQ on lower profit from E&P. Although we expect E&P profit to remain the key earnings support in 3Q24, the maintenance planned is expected to pull down the segment's profit in 3Q24. This will also affect GSP production and drag down the gas business profit. Some compensation will be provided by higher market GRM for the P&R segment, in our view, as market GRM has already recovered 24% QTD to US\$4.3/bbl.

Key risks: An economic slowdown would erode demand for PTT's energy and petrochemical products while oil price volatility may cause more stock loss. Other risks are asset impairment, losses from asset divestment, regulatory changes on GHG emissions and the government's intervention in the retail oil business. Key ESG risk factors are the environmental impact of its business and how it adapts during the transition to clean energy.

Governance Score Rank	2/67

ESG comment

PTT's ESG score in 2022 was above the sector average, with an outstanding environmental score and satisfactory governance score. The social score was slightly below average, based on Bloomberg assessments, despite the company's proactive and continuous social contribution activities.

Value proposition

PTT's fully integrated model for its energy and petrochemical businesses protected its earnings during the oil price crashes in 2008, 2014-16 and 2020-21. This will be a key strength in the longer term amidst volatile oil price in 2024 given the persistent geopolitical risks. The E&P business will remain PTT's key profit contributor, followed by gas and oil businesses. Its balance sheet has become increasingly solid after several asset impairments in past years to reflect low oil price. PTT has a strong balance sheet with 0.2-0.3x net D/E ratio for the next three years. This should cushion it from the adverse impact of volatile oil prices as they occur.

Business outlook

PTT's optimism on oil price has dimmed slightly on market fears about the global economic outlook and higher inflationary pressure caused by high oil price. This is offset by tighter supply from OPEC and its allies following their agreement to extend production cut to end-3Q24, which is expected to be prolonged further if oil price dips. PTT will continue to focus on its gas business, which has a stable cash flow and steady demand growth. The latest Power Development Plan (PDP) continues to assign the majority of the country's electricity generation for the next 17 years to gas-fired power plants. PTT's oil retailing business, under subsidiary PTT Oil and Retail Business Plc (OR), will continue to expand its outlets with a focus on the new business model of ventures in non-oil businesses such as food and beverages. This will gradually improve earnings contribution from this segment from <5% currently. PTT is also actively planning investment in new businesses (including the electric vehicle value chain and life sciences) and new energy under its new S-curve strategy. This is aimed at reducing dependency on commodity-related businesses and thereby obtain a more sustainable earnings flow.

Bullish views	Bearish views
1. PTT's business integration protects its earnings from the volatility of oil price.	1. Government moves to cap domestic energy prices will hurt PTT's earnings in the near term.
2. PTT's gas sales volume is expected to gradually increase in the medium term on higher electricity consumption as economic activities improve.	2. More threat from new players in the gas business upon liberalization of the industry, chiefly in terms of LNG imports.
3. Domestic oil demand continued to recover to pre-COVID level, especially for diesel and gasoline, while jet fuel demand is gradually recovering towards the pre-COVID level. This is expected to solidify earnings for PTT's oil business and oil refining associates in 2024. It could, however, be partly offset by weak performance at petrochemical subsidiaries and associates as product spreads remain subdued.	3. Unexciting earnings growth outlook

Key catalysts

Factor	Event	Impact	Comment
Oil price movement	OPEC's supply curb and geopolitics continues to support oil price in the near term.	Positive	A better demand-supply balance in the oil market is expected to support oil price for the next 3-6 months supported by more disciplined production cuts by OPEC+. Geopolitical risk will continue to add a premium to oil price until positive signs of easing conflict are seen.
Slower global oil demand growth on fears of global economy	Higher prices and a deteriorating economic environment may erode oil demand. Slower recovery of China's economy also decelerates growth of oil consumption.	Negative	IEA sees world oil demand growth to continue to decelerate in 2Q24F with the slowest quarterly increase since 4Q22 at only 710kb/d due to contracting demand in China. Global oil demand growth is forecast to average just below 1mb/d in 2024 and 2025.
Near-term earnings outlook	2Q24F earnings momentum	Higher QoQ and YoY	We expect 2Q24F profit to strengthen YoY and QoQ despite lower contribution from the P&R segment and an adverse impact from single gas pool price. Solid E&P profit contribution remains the key support with lower FX loss and higher gain from derivatives.

Sensitivity Analysis

Factor	Earnings impact	TP impact
EBITDA margin (+1%)	+8% (2024F)	+Bt0.3/share

Our view on ESG

We view that PTT provides concrete targets on environmental and social issues with a committed timeline and actual performance relative to its targets. We view its management and governance as satisfactory, reflecting management's expertise and experience in the business, with a diverse board of directors and transparency with stakeholders.

ESG Disclosure Score

Bloomberg ESG Score	67.58 (2022)
Rank in Sector	10/67

CG Rating	DJSI	SETESG	SET ESG Ratings	
PTT	5	Yes	Yes	AAA

Source: Thai Institute of Directors (IOD), SET

Environmental Issue (E)

- PTT aims at limiting PTT Group's greenhouse gas emissions, both scope 1 and scope 2. The long-term target of reducing emission 15% by 2030 compares to 2020 greenhouse gas emissions and achieving Carbon Neutrality by 2040 and Net Zero emissions by 2050 for PTT-owned operations. PTT group was able to achieve target in 2023 with CO₂ emission of 41.59mn tons vs. its ≤51.5mn tons target.
- PTT has outlined a shift in business model for the country's target industries, which includes investing in the future of energy, such as renewable energy, energy storage systems and electric vehicles.
- PTT also conducts research and studies in Carbon Capture and Storage (CCS) technology and is studying the feasibility of using carbon dioxide for commercial benefits in addition to compensation for greenhouse gas emissions within the PTT Group from reforestation by introducing one million rai of land for the Low Emission Support Scheme (LESS).

Governance Issue (G)

- PTT's board of directors consists of 15 directors, 14 non-executive directors (93.33% of the entire board), 12 independent directors, which exceeds half of the board (80% of the entire Board), and an executive director.
- PTT was rated "5 star" (Excellent) by the Thai Institute of Directors for 13 consecutive years.
- We view PTT's management and governance as satisfactory, reflecting management's expertise and experience in the oil and gas sector, its transparency with stakeholders, and its independent board of directors.

Social Issue (S)

- PTT is committed to driving Thailand through enhanced national energy security and economic growth in parallel with a better quality of life for society and communities. The company supports public policy in alleviating higher energy cost in Thailand.
- PTT's performance in safety management with KPI on safety and occupational health for employees met target with no lost time accidents in 2023 while three incidents were reported for contractors.
- PTT's Human Capital Index for 2023 remains on track at 80%, vs. short-term target of >76%.
- Long-term consumer behavior on fossil fuel could impact PTT's oil and gas products but PTT has mitigated this risk via its investment in the power business via GPSC and in the EV supply chain, including a JV with Foxconn of Taiwan to manufacture on the EV platform in Thailand.

Explanations

Companies participating in Thailand's Private Sector Collective Action Coalition Against Corruption programme (Thai CAC) under Thai Institute of Directors (as of November 1, 2023) are categorised into: companies that have declared their intention to join CAC, and companies certified by CAC.
